ใบงานคำสั่ง SELECT พื้นฐาน

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT population
FROM world
WHERE name = 'German'
```

Submit SQL restore default

Wrong answer. Too few rows.

population

Show what the answer should be...

population
80716000

1. Select the code which produces this table

Scandinavia

2.

Checking a list The word **IN** allows us to check if an item is in a list. The example shows the name and population for the countries 'Brazil', 'Russia', 'India' and 'China'.

Show the name and the population for 'Sweden', 'Norway' and 'Denmark'.

```
SELECT name, population
FROM world
 WHERE name IN ('Sweden', 'Norway', 'Timor-Leste');
```

Submit SQL restore default

Wrong answer. Some of the values are incorrect.

name	population
Norway	5124383
Sweden	9675885
Timor-Leste	1212107

Show what the answer should be...

2. Pick the result you would obtain from this code

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name, population
FROM world
WHERE name LIKE "Al%"
```

Submit SQL restore default

Wrong answer. Too many columns.

name	population
Albania	2821977
Algeria	38700000

Show what the answer should be...

3. Select the code which shows the countries that end in A or L

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name
FROM world
 WHERE name LIKE '%a' OR name LIKE '%l'
```

Submit SQL restore default

Wrong answer. Too many rows.

name
Algeria
Angola
Botswana
Equatorial Guinea
Eritrea
Ethiopia
Gambia

4. Pick the result from the query

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , length(name)
FROM world
WHERE length(name) =5 and region = 'Europe'
```

Submit SQL restore default

SQL error

Unknown column 'region' in 'WHERE'

5. Here are the first few rows of the world table

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , area , population , gdp
FROM world
WHERE population
```

Submit SQL restore default

Wrong answer. Too many columns.

name	area	population	gdp
Afghanistan	652230	25500100	20364000000
Albania	28748	2821977	12044000000
Algeria	2381741	38700000	207021000000
Andorra	468	76098	3222000000
Angola	1246700	19183590	116308000000
Antigua and Barbuda	442	86295	1176000000
Argentina	2780400	42669500	477028000000

6. Select the code that would show the countries with an area larger than 50000 and a

Scandinavia

2.

Checking a list The word **IN** allows us to check if an item is in a list. The example shows the name and population for the countries 'Brazil', 'Russia', 'India' and 'China'.

Show the name and the population for 'Sweden', 'Norway' and 'Denmark'.

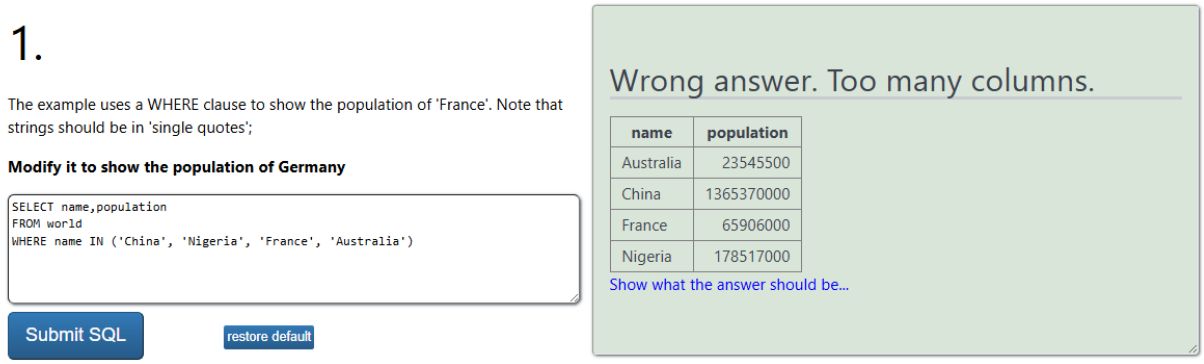
```
SELECT name, area, population
  FROM world
WHERE area > 50000 AND population < 10000000
```

Submit SQL restore default

Wrong answer. Too many columns.

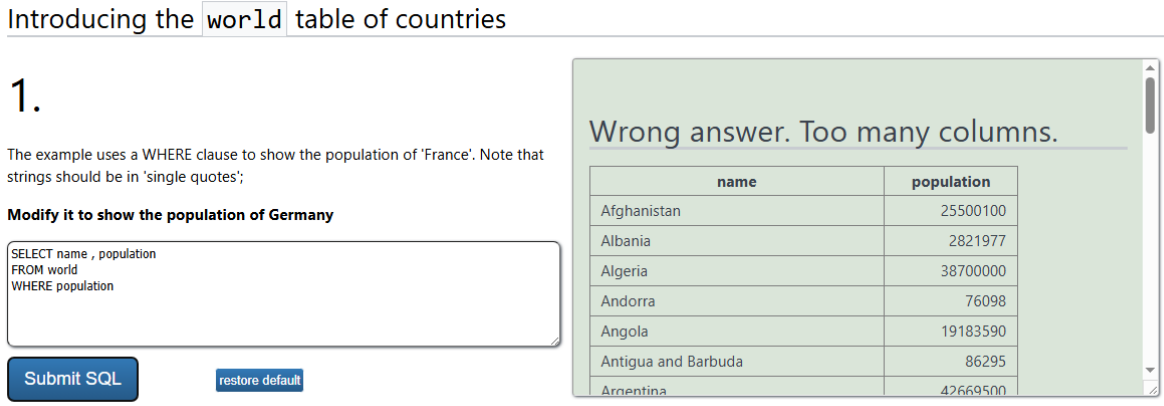
name	area	population
Austria	83871	8504850
Azerbaijan	86600	9477100
Belarus	207600	9467000
Benin	112622	9988068
Bosnia and Herzegovina	51209	3791622
Botswana	582000	2024904
Bulgaria	110879	7245677
Central African Republic	622984	4709000
Congo, Republic of	342000	4559000

7. Select the code that shows the population density of China, Australia, Nigeria and France



1. ให้แสดงเฉพาะ ชื่อประเทศ และ ทวีป

2. ให้แสดงชื่อประเทศ พร้อมจำนวนประชากร



3. ให้แสดงข้อมูลประเทศที่อยู่ในทวีป Europe

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , population
FROM world
WHERE continent = 'Europe'
```

Submit SQL restore default

Wrong answer. Too many columns.

name	population
Albania	2821977
Andorra	76098
Austria	8504850
Belarus	9467000
Belgium	11198638
Bosnia and Herzegovina	3791622
Bulgaria	7245677

4. ให้แสดงชื่อประเทศและประชากรของประเทศที่มีประชากรมากกว่า 20,000,000 คน

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , population
FROM world
WHERE population > 20000000
```

Submit SQL restore default

Wrong answer. Too many columns.

name	population
Afghanistan	25500100
Algeria	38700000
Argentina	42669500
Australia	23545500
Bangladesh	156557000
Brazil	202794000
Cameroon	20386799

5. ให้แสดงประเทศที่มีพื้นที่น้อยกว่า 1,000 ตารางกิโลเมตร

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , area
FROM world
WHERE area < 1000
```

Submit SQL restore default

Wrong answer. Too many columns.

name	area
Andorra	468
Antigua and Barbuda	442
Bahrain	765
Barbados	430
Dominica	751
Grenada	344
Kiribati	811

6. ให้แสดงประเทศที่มี GDP มากกว่า 100,000,000,000

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , gdp
FROM world
WHERE gdp > 100000000000
```

Submit SQL restore default

Wrong answer. Too many columns.

name	gdp
Algeria	207021000000
Angola	116308000000
Argentina	477028000000
Australia	1564419000000
Austria	394458000000
Bangladesh	127195000000
Belgium	483402000000

7. ให้แสดงชื่อประเทศและทวีปของประเทศที่อยู่ในทวีป Africa

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name ,  continent
FROM world
WHERE continent = 'Africa'
```

Submit SQL restore default

Wrong answer. Too many columns.

name	continent
Algeria	Africa
Angola	Africa
Benin	Africa
Botswana	Africa
Burkina Faso	Africa
Burundi	Africa
Cameroon	Africa

8. ให้แสดงชื่อประเทศ พื้นที่ และประชากร ของประเทศที่มีประชากรมากกว่า 30,000,000 คน

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , area , population
FROM world
WHERE population > 30000000
```

Submit SQL restore default

Wrong answer. Too many columns.

name	area	population
Algeria	2381741	38700000
Argentina	2780400	42669500
Bangladesh	147570	156557000
Brazil	8515767	202794000
Canada	9984670	35427524
China	9596961	1365370000
Colombia	1141748	47662000

9. ให้แสดงข้อมูลทั้งหมดของประเทศ Afghanistan

Introducing the `world` table of countries

1.

The example uses a WHERE clause to show the population of 'France'. Note that strings should be in 'single quotes';

Modify it to show the population of Germany

```
SELECT name , continent , area , population , gdp
FROM world
 WHERE name = 'Afghanistan'
```

Submit SQL restore default

Wrong answer. Too many columns.

name	continent	area	population	gdp
Afghanistan	Asia	652230	25500100	20364000000
